## Skills

### Languages

- JavaScript
- PostgreSQL
- Unix Scripting
- HTML/CSS

### Tools

- |                 |            |
|-----------------|------------|
| AngularJS       | node.js    |
| Adobe CC        | Express    |
| Git + GitHub    | ReactJS    |
| Jasmine         | jQuery     |
| Mocha & Chai    | Bootstrap  |
| Final Cut Pro   | SalesForce |
| Pivotal Tracker | Camtasia   |

### Techniques

- Pair Programming
- Responsive Design
- Agile Development
- Test Driven Development

## Projects

### HyperBot

The HyperBot is an IoT project with three main functionalities. 1) The user can enter hyper-lapse information and the HyperBot with autonomously drive that path at a constant rate capturing images. 2) The user can capture video with the robotic car. 3) The user can control the motions of the car via the accelerometer on the iPhone. *Built with Ionic, Firebase, web sockets, and Raspberry Pi.*

### Clique

A modern take on group messaging that gives the user multiple options to view messages. The ultimate goal is to provide the user with a summary of what was said by whom with the user was inactive, with the added ability to replay the messages in chronological order. *Clique is a mobile app built with Firebase real-time database and AngularJS/Ionic*

### BrewBuddy

Brew Buddy is a tool for home brewer's to keep track of the brew process, beer inventory, equipment inventory, and cleaning duties. Added features include a google maps integrations for local brewery inspiration. *Brew Buddy is a web application build with Node.js, Express, PostgreSQL, and jQuery.*

### Pic.edu

Pic.edu is an educational assistant for foreign language students that provides the student with a common English idiom and replaces all verbs and nouns with an image provided by Google Images API to represent that concept.
