### Techniques

Pair Programming  
Responsive Design  
Agile Development

## Projects

### Clique

A native iOS/Android group messaging application with static nodes for each user. Once logged in you can see what was missed while you were away.

- Built with React Native
- Integration with Twilio Messaging API

### Routes

A travel web-app that shows an integrated view of Google Maps with aggregate user data to see the most travelled route through a country.

- Built with AngularJS and PostgreSQL

### BrewBuddy

A web-app that helps homebrewer's keep track of the brewing process including their equipment, ingredients, stock, and cleaning supplies.

- Twitter OAuth with BCrypt, and form control

### InnerWaves

An e-commerce web-app that allows customers to browse and purchase clothing with full dynamic shopping cart for easy UI/UX.
